Note on Methodology:

This fact sheet only includes data for participation in the School Breakfast and National School Lunch Programs in public, non-charter schools in Pennsylvania. It does not include data for private schools, religious schools, charter schools, or alternate programs. The average daily student participation rate for October 2018 was calculated by dividing the number of free and reduced-price (FRP) breakfast and lunches served by the number of school days for that same month. The average daily FRP school breakfast participation was then compared to the average daily FRP lunch participation. School district student totals are based on data for all district schools that participate in the national school lunch program. Schools that do not have breakfast program are included as "zero" breakfasts served (and therefore impact the breakfast to lunch ratio), so long as at least one district school serves breakfast. Schools that do not participate in the national school lunch program are not included.
